Hardware-Engineer Aerospace

Are you interested in developing high-end electronic systems for the aerospace industry? We at DSI develop hardware and software solutions and computer technologies as well as innovative communication systems for space applications.

DSI hardware and software are flying as part of prominent space programs such as ExoMars (Mars mission) Copernicus (meteorological satellite) and JUICE (Jupiter mission). Since 1997, our steadily growing team has been producing highly innovative, customer-specific and dependable solutions.

For the upcoming projects we are looking for you to strengthen our team at DSI Aerospace Technologie GmbH!

What are your responsibilities?

- Requirement engineering and close co-workmanship with the systems engineering
- Establishing of a detailed block diagram
- EEE Part selection for different models e.g. EM/EQM/PFM
- Development of analogue and digital circuits
- Execution of analyses and simulations for circuit parts with tools such as PSpice or LT Spice
- Creation of schematics and PCB layout with Altium Designer
- Generation of analysis reports, e.g. WCA, derating, reliability and power
- Creation and execution of electrical test procedures
- Environmental verification of hardware
- Cooperation with external verification laboratories and review of test reports
- Technical documentation

What do we expect from you?

- Completed degree in Electronics/Communications engineering or comparable work experience
- Experience in the field of circuit diagram development
- Confident in handling measuring instruments (oscilloscope)
- Interest in circuit and PCB design
- Experience with Altium Designer and Spice Tools is a plus
- Structured, independent way of working and a high level of responsibility and quality awareness
- Flexibility, enthusiasm, initiative and the ability to work in a team as well as cooperating in large projects
- Good English knowledge. Basic German knowledge would be an advantage

What are we offering?

- Competitive salary and up to +100% company contribution to corporate pension insurance
- Challenging and varied tasks encompassing all aspects of hardware engineering and verification
- Friendly and informal team atmosphere with a flat organisational hierarchy in an international team
- Possibility of flexible and family-friendly working hours
- Central location with good transport connections
- Company-financed fitness club membership
